THE REDCLIFF REVIEW THURSDAY, APRIL 20th 1933

Number 28.

Donald McLachlan Passed Away Saturday

Death Comes Suddenly After
Short Illness

Donald McLachlan is dead. It is a long time since the citizens of Redcliff got such a shock as was experienced when this news was rapidly passed around town last Saturday morning. Although it was known that Donald had been ill for a week or ten days the fact that his condition was not thought serious and the belief that he was gradually recovering made the shock all the more severe.

About two weeks ago the late Mr. McLachlan was taken suddenly ill with an attack of jaundice. On Friday last he was taken to the hospital for treatment but it was soon learned that complications had developed and that his case was hopeless. On Saturday morning at 11 o'clock he passed away.

The late Don McLachlan was born in Glasgow, Scotland, sixty years ago last month. When a young man he came to Canada and, being an expert joiner and carpenter, he experienced no difficulty securing employment in Toronto where he remained and was very successful for several years.

Coming west in 1911 he arrived in Redcliff in the boom days and with a partner went into the contracting business under the firm name of McLachlan & McLean, and some of the best buildings in town today stand out as a monument to the skill and thoroughness of this firm.

After Mr. McLachlan's unexpected tragedy in many other lines of business, in all of which his fair treatment, honesty, jovial disposition, kindness and strict attention to business, played a large part in the success of them all. The same principles were characteristic of his domestic life and many less fortunate have enjoyed the hospitality of his home.

Besides his wife deceased leaves one son and two daughters to whom the sympathy of the community goes out in their great loss of congenial, thoughtful husband, and an indulgent father.

The members of his family are (Agnes) Mrs. Percy Rand, of Summerland, B. C.; (Gladys) Mrs. C. Baincock, of Ponfrikton, B. C. and Hoss at home.

The funeral which took place yesterday afternoon from Gordon Memorial church was one of the largest ever held in town. The large number who accompanied remains to the cemetery and the mountain of flowers which covered the casket, are but a mild testimony of deceased's popularity and the esteem in which he was held by the public.

In a body at the funeral were the Masonic order, the I. O. O. F. members of the Legion and the auxiliary and the procession was led by Major Hostie's pipe band.

The remains were interred in Redcliff cemetery.

Dominion Glass Plant Takes on More Men

New Machine Put in Operation
This Week

This week the Dominion Glass plant here received several big rush orders for their wares. In order to speed up production another machine has been put in operation. This means that a large number of men have been added to the staff in both the plant and the yard, taking care of most of the unemployed here.

Oratorio Given Here Was Greatly Enjoyed

The Oratorio "The Seven Last Words" by Dubois, rendered in St. Ambrose Church last Thursday evening, by St. Barnabas Church Choir of Medicine Hat was thoroughly enjoyed by those who attended. What the audience lacked in numbers was made up in appreciation. After the entertainment the choir repaired to the Parish Hall where refreshments were served and a pleasant social time enjoyed.

Two Against the World Is Thrilling Drama

Opens at New Dreamland
Theatre on Monday

The story is a brilliant drama of high society with a dramatic court room scene, in which a beautiful society girl confesses to a crime of which she is not guilty. She drags her honor in the dust in order to shield a brother from the electric chair and her unmarried sister from a scandal.

There is an unusually strong cast with Miss Bennett supported by Neil Hamilton, who, although he is in love with her, is forced to prosecute her brother on a murder charge, and compelled to listen to the story of her dishonor from her own lips.

The backgrounds and settings are particularly lavish, representing wealthy homes, magnificent furnished apartments of wealthy club men.

Better than "Rockabye".

BRITISH ENGINEERS
IN RUSSIA SENTENCED

The trial of the six British Engineers in Russia, who were charged with espionage, bribery and sabotage ended yesterday. Two of them Thornton and Macdonald, were given three and two years sentences respectively; Monkhouse, Cusby and Nordwell were ordered to leave the country with in three days, and Gregory was acquitted.

Mr. and Mrs. A. McGregor and Mr. and Mrs. W. Armstrong were visitors in town on Monday the guests of Mr. and Mrs. W. J. Fairbairn.

The Scottish cup was won by the Celtics in a 1-0 game, with Motherwell, before a crowd of 102,000 persons, at Glasgow last Saturday.

Turtle For Two.

The turtle was "in closer" when this picture was taken, and "in the soup" shortly after. The background study is black and white is provided by the Misses Marion Webster and Helen Mackay, of Montreal, on board the Canadian Pacific liner "Empress of Britain" in which they cruised around the world. The turtle, like many other rare and exotic delicacies consumed by four hundred passengers during their 30,000 mile cruise, only went dry way.

Alberta Cattle For Overseas Shipment

Expect to Ship 7 or 8 thousand
Head This Year

Alberta cattle raisers are looking for a fairly substantial shipment of cattle from the province to the British market again this year. Last year of the 28,000 head exported from Canada overseas, it is estimated, nearly one quarter came from Alberta feed lots and ranges. This year it is possible between 7,000 and 8,000 head will find their way to the British market out of the 30,000 or more head which were fed in the province during the past winter on special feed lots and under the ordinary farm conditions. Alberta's total shipments of cattle out of the province during 1932, to other provinces and to export were over 96,000 head.

No Need For Alarm Re Grasshopper Pest

Watch For Breeding Grounds
At End Of May

Though there is no need for great alarm among the farmers this spring regarding grasshopper outbreak, there undoubtedly will be outbreaks in certain of the southern sections of the province. Farmers are urged not to be concerned about hoppers or eggs appearing at present but to be on the watch for breeding grounds during the latter part of May, when the harmful species will appear.

Farmers are asked to send samples of hoppers or eggs at any time to H. L. Seaman, Dominion entomologist at Lethbridge.

Mr. and Mrs. W. J. Fairbairn experienced a very pleasant surprise on Good Friday when their two sons, Lloyd of Uxley, Sask. and Earl of Calgary, with their wives and families arrived to spend the Easter holidays with them.

TRAIL RANGERS AND TUXIS

In the bird-house contest which was held last week Robert Pow won the first prize and Jack Learmonth and Leonard Morton the second and third.

The C. G. I. T. held a badminton tournament on Monday when a number of the Tuxis boys were present and played a number of mixed doubles.

The Tuxis Square has been instrumental in getting racketeers and organizing the badminton court in the church basement.

STRESSES THE VALUE OF ADVERTISING

Addressing annual meeting of Bovril Limited in London recently, Lord Luke chairman of the board, drew attention to the fact that while due economy had been practiced in every other department the concern had not diminished its advertising. "We consider it of the utmost importance," he said, "to keep our advertising bright and persistent. At a time when purchasing power in many countries is much reduced, a policy of keeping the virtues of our product well in the public eye meets strongly with your board's approval."

Mr. A. G. Osagood fell suddenly ill on Tuesday and had to be taken to the hospital in Medicine Hat for treatment.

Mrs. Hicks and son C. L. Hicks motored to Calgary Sunday to spend the week end, with Miss Hicks who is in training in one of the hospitals of that city.

While there they were joined by Mrs. Hicks's other daughter Mrs. Mallard of Casper, who had motored into the city accompanied by her husband and son Donald. Mrs. Hicks and Leonard returned on Monday night and claim they are glad to get back to the "banana belt" after plowing through two feet of snow in and about Calgary.

Gratifying Film At New Dreamland

"42nd Street" One Of The Best
Musicals Seen

Even the appeal of a new and glamorous star Ruby Keeler, the spirited work of Bebe Daniels and Warner Baxter's best screen portrayal could not divert patrons' attention from the clean, wholesome and refreshing story of "42nd Street," the holiday feature at the Dreamland theatre this week end. It presents the major details of a musical in the making, and of itself, is one of the best musicals we have seen.

It has everything that goes to the making of a superbly gorgeous picture, good narrative, acceptable plot, wise direction, delightful dancing and singing, with principals and extras doing their best, keen to take every advantage of the abundant and admirable opportunities.

Object of most of the interest in personalities, Ruby Keeler, Mrs. Al Jolson in private life makes her first screen appearance and all we need say is that we hope it is not her last. Two other girls, greatly popular with screen fans, Una Merkel and Ginger Rogers, also do efficient work, but they are rather lost towards the end of the play.

A foot of snow fell in Calgary and district last Sunday. This district got the tail end of the storm with only a slight flurry of snow. The thermometer, however, dropped several degrees Sunday night and Monday.

Redcliff Reminiscences

Taken From Our File of
April 17 1914

BIRTHS — Hodges—In Redcliff, on Saturday, April 4, 1914 to Mr. and Mrs. A. Hodges, a daughter.

Council will spend \$155,000 for water extensions etc. this fall.

Since January 1913 the population of Redcliff has increased by 2500 souls.

While working on the brick work of the Red block, the scaffolding gave way and Messrs. S. Wynn, R. Moninger and F. Broughton fell a distance of 12 feet. They sustained pain but not serious injuries.

The new Motor Works, turned out three fine buses this week and have orders for eleven more for May delivery. These buses range in price from \$4275 to \$4650 each. The price of the trucks is from \$2625 to \$2875.

A motion to exempt church property from taxation was carried unanimously at the last Council meeting.

Work on the new planning mill, was started this week.

There are now 800 houses and business blocks in town. 158 of which are of brick.

A DISAPPOINTMENT

The last session of the provincial legislature which was brought to a close last Thursday was a distinct disappointment to the general public. With such unprecedented conditions existing throughout the country and with little hope for improvement in the immediate future the public looked forward to and expected that some unprecedented action would be taken by the legislature with a view to at least attempting to improve those conditions. In this they were disappointed. The legislature met, carried on and dispersed in much the same manner as in past sessions. There was one exception and that was that there appeared to be tightening up of the party feelings on the part of the several opposition groups as well as with the government members. Each of the several groups introduced resolutions but in almost every instance all the other groups voted against them. By this action it looked as though each group was afraid some other group might get credit for doing something worth while. The only group which appeared to realize it represented the people and was paid for looking after the business of the province and not of some particular group, was the Independents.

On the whole the session showed that what we need in our legislature is more Independents if we hope to get any place.

It is a sure sign that the action of the provincial government in connection with the system of issuing auto licenses this year is universally unpopular, when the U. F. A. passes a resolution condemning it.

"This is a man made depression. God has given us that which is necessary for man, but man has made this depression because he has thought too much of himself and not enough of his neighbor," declared Rt. Rev. P. J. Monahan, Roman Catholic Bishop of Calgary, addressing the Kiwanis Club last Thursday.

It is now quite evident that judges in Canada intend doing their part to discourage the hold up and robbery rackets. Long sentences for these crimes are now quite common. The climax was reached in a Vancouver case where life sentences were meted out to two youths. This should be a warning to those who are contemplating going into that line of business.

The disastrous prairie fire in the Drumheller district last week, which cost the loss of three lives and thousands of dollars, worth of damage to farm buildings, is another reminder that immediate attention should be given to safeguarding farm and town property against similar disaster. The dry condi-

tion of the prairie, together with the accumulation of weeds and rubbish, makes ideal fodder for giving a fire a good start.

Fire guards should be placed around farm buildings and in town attention should be given to weeds and papers in fence corners.

One by one the pioneers of our town are passing on. In the death of Donald McLachlan last Sunday Redcliff lost a citizen who, since the town started, has played an important part in laying its foundations. He was a member of the first town council after the town was incorporated, and was later a member of the school board. Besides these he also held several important positions at the request of the council and for several years past has been building inspector for the town. The passing of Donald McLachlan is another reminder of what the west owes to its pioneers.

CANADIAN AUTHOR
MAKES BIG HIT

The literary hit of the year has been made by Frederick Niven, an author residing in Nelson, B.C. whose novel entitled "Mrs. Barry" is described by Crompton Mackenzie in the Daily Mail as a profoundly moving book, and is hailed as a classic worthy to stand beside Sir James Barrie's "Margaret Ogilvy". Although Frederick Niven has a long list of books to his credit, and has always enjoyed a following among the critics, this is his first appearance among the "best sellers". He worked his way through Canada early this century, and at one time handled baggage and freight for the C. P. R. at Nelson, B.C. He eventually took up a small holding on Kootenay Lake twenty years ago where he has secured excellent local color for his western stories. "Mrs. Barry" is a novel of life in Glasgow, where at one time Frederick Niven edited a newspaper.

Canada's Pole Timber Supply

Selecting Suitable Species To Meet Steady Demand From Communities

The steady demand for all classes of wooden poles for telephone and telegraph line construction by Canadian companies has provided the impetus for the solution of which has been one of the important tasks of the Forest Products Laboratories of the Forest Service, Department of the Interior. Toward the end of the last decade, the pole requirements of communication companies in Canada were limited principally to those timbers having decay-resisting properties. Eastern red cedar was used for nearly all poles in Eastern Canada and western red cedar in Western Canada.

As the available supply of this class of timber in Eastern Canada appeared to be inadequate to meet the demand for poles, and as the heavier loads on poles required greater strength, it was of the utmost importance that an additional Canadian source of pole timber be developed. The preservative treatment in pole sizes of the less durable species, such as jack pine indicated a possible source of supply of great quantities of poles, as these two species had been little used for this purpose because of their susceptibility to decay.

The question of their utilization as poles however depended on a considerable degree upon their strength in pole sizes and the investigation of this phase of the problem was undertaken by the Forest Service in co-operation with satisfactory results. Treated red pine and jack pine poles are now being used in Eastern Canada and treated lodgepole pine and Douglas fir as well as western red cedar poles in Western Canada.

Canada can now supply telephone and telegraph poles to meet any reasonable requirement or specification. Large quantities of western red cedar poles and treated lodgepole pine and Douglas fir poles are exported to the United States but so far Canada has not enjoyed any appreciable proportion of the United States demand. The bulk of the British pole requirements being supplied by Baltic countries. However it is expected that the British market obtains a better knowledge of the qualities of Canadian poles, a new market for these products will be opened in the United Kingdom.

The use of the heavier pole species such as red pine, jack pine, lodgepole pine and Douglas fir has increased the experimental stage. Comprehensive strength tests on full-sized poles have been carried out in the Forest Products Laboratories of the Forest Service, Department of the Interior, on all recognized pole species and the results of these tests are being made available to the pole preservative treatment of pole species available in the Laboratories and from the records of growing and the ability companies throughout the Dominion.

Destination Is Known

British Empire Always Follows A Well Charted Course

Hon. C. Howard Ferguson, Canada's High Commissioner in London, contributes an article of encouragement to "The Star," the official organ of the Many League of Canada. Having referred to the patriotic work of this League and other similar organizations in Canada, in the broader questions of Imperial economic affairs, and to the turmoil in most other countries of the world, Mr. Ferguson says: "The Empire still is re-performing difficult weather, but the compass is the best that experience and political seamanship can devise, and the course itself has been well and truly charted. Minor deviations from the route there may be, but very vague and very hazy, but I believe in the steady and sure progress of the reasoned outlook of reasonable men in Empire matters."

Decreased Liquor Sales

Nova Scotians Consuming Twenty-Five Per Cent Less Liquor

Decrease is about 25 per cent in sales of liquor through the Nova Scotia liquor commission during the last fiscal year is shown in the commission's annual report.

Total sales of liquor dropped by \$1,395,123 during the year, as compared with 1931. This figure represents a decrease of 25.7 per cent over the period from October 2, 1931, to September 30, 1932.

The Royal yacht, "Victoria and Albert," is the largest yacht in the world; it is the third vessel to bear that name.

CANADA OCCUPIES PROMINENT CORNER IN BRITISH INDUSTRIES FAIR

Our picture shows the Canadian exhibit in the Empire Marketing Board section of the British Industries Fair in London, England. Canada had two exhibits at the fair but the one above was sponsored by the Marketing Board, whose duty it is to boost Empire products in the British Isles.

Re-Establishing Elk in Ontario

Wife Animals From Buffalo National Park, Will Be Placed On Bureau Industrial Park Lands

Canada's leadership in wild life conservation, as witnessed here success in the restoring of the buffalo, the protection of the antelope, and the propagation of the elk (wapiti), is widely recognized and the recent experiments in the re-establishing of the elk in Ontario have attracted widespread attention. The Government of Ontario last fall established a herd of twenty-five elk in a selected area in the Pembroke Crown Game Reserve near Peterborough. These animals were supplied by the National Parks Service of the Department of the Interior from the herd of close to 1,000 in Buffalo National Park, near Watnagh, Alberta. The success of last year's experiment led to the proposal to establish another herd on the lands of the Bureau Industrial Park, twenty miles east of Sudbury, Ontario. At the request of the Ontario Fish and Game Department, the Department of the Interior is supplying two caribou of these animals, fifty head in all. The capture of this herd is now in progress at Buffalo National Park and the animals will be shipped east as soon as it is complete.

The shipment last autumn of elk for Peterborough, last November 13, on the morning of November 13, and arrived at its destination on November 13, in excellent condition. The twenty-five head were shipped loose in the car under the care of an experienced park warden, who accompanied the animals and saw that they were fed and watered at proper intervals en route. The animals suffered no discomfort during their five-day journey and all arrived safely. The area on which the animals were placed was one part of the natural habitat of the elk, but they have long since disappeared from the district, owing, no doubt, to the advance of civilization.

In establishing the National Parks of Canada one of the objects was the conservation of wild life. Each park is a life sanctuary, many were it for these sanctuaries, many species of wild animals would, undoubtedly, have disappeared or been greatly depleted. These reservations assure the perpetuation of the different species of wild life within their confines, and act as reservoirs from which depopulated areas may be replenished.

The Darkest Hour

Gloom Of Depression May Soon Be Swept Away

Toward the end of every business depression in history, the economic psychology has always developed. There is nothing new or strange in this; the same mental condition obtained toward the end of every depression in a hundred years of business and stock market history. The darkest hour precedes dawn; this is as true in business as in relation to solar phenomena. The hopeful thing about it all is that this state of thought is transitory, the continuance of better things. Argonaut, San Francisco.

Canadian Tobacco Features

The outstanding feature of the tobacco-growing industry in Canada continues to be the growing importance of the bright sun-cured type, says the "Economic Annals," published by the Dominion Department of Agriculture. Production of this type has risen from 85 million pounds in 1928 to 21 million pounds in 1932.

The childless is as much as home hanging upside down as it is in an upright position.

For Freight Rate Adjustment

Rate On Better Shipments Is Proposed At Regina

Protests of discrimination between freight rates on better in effect in North Dakota and those effective in Saskatchewan were lodged before the board of railway commissioners at Regina.

An application was made by the Saskatchewan Co-operative Creameries for a reduced scale of freight on butter. This application was supported by the submissions of the Saskatchewan Government, placed before the board by George H. Smith, traffic and freight rates expert.

No decision was given and permission was granted to the railways to submit written argument, on the condition that a copy of their submissions be sent to Mr. Smith. Briefly, the application asks for: 1. The establishment of fair and equitable rates from Saskatchewan shipping points to eastern Canada on all butter shipments from Saskatchewan. 2. The inauguration of a similar rate policy on Saskatchewan butter shipments as the Soo Line, Great Northern and Northern Pacific Railways have adopted on butter shipments from Minnesota and North Dakota creameries, which provides for a special commodity rate from butter producing states to final marketing points.

Mail To Cost Million

New Firms At Home Is To Be Strictly Modern

At the cost of \$1,000,000, Home is to have a new prison, with every modern improvement, including steam heat and well lighted workshops. It will be built near the old Block, West on the outskirts of the city. It will have cells for holding remanded prisoners or those awaiting trial and for keeping their preliminary examinations secret from the public, prisoners not easy in the old prison called Regina Court (Queen of Heaven), situated on Tiber's bank on the site of a monastery from which it took its name.

Judge—You, a respectable young man, also a cost? In recognition you have lost your job, and you brought trouble and sorrow to your parents. Accomplish—Yes, and it was too light.

July 1934, in the time set for the opening of the \$20,000,000 money tunnel in England.

"WAVE DOWN BASS"

"Wave down bass" was my play, "Arms and the Man" is a complimentary title." (Bernard Shaw passed through China recently on a world tour.)—Strut in the Daily Express.

Had Record As Horseman

John Wesley the Evangelist Traveled Thousands Of Miles In Saddle

Quakerian states to readers are quite common, but the statute recently unveiled at Bristol to the Rev. John Wesley, may be unique in that the evangelist is shown on horseback.

It was at Bristol, when 33 years of age, that John Wesley preached his first open-air address, and from there that he set out on horseback to carry his message to the people of England. John Wesley, if not the first circuit rider, was the greatest of all, because he spent more time in the saddle than any man in the world who has ever been honored with an equestrian statue. His record probably beats that of any cowboy or horseman who ever lived.

In his journal, under date March 1770, he states that he had then ridden "what is called the great thousand miles." He died 21 years later, in March, 1791, aged 88, and he was still riding in his eighties, though later he used his own chains and horses or the stage coaches.

Of the 225,000 miles he travelled in his 52 years as an itinerant preacher, by far the greater part must have been on horseback. And so to the time he spent in the saddle, it must be remembered that he went at a pace which allowed him to read.

"History, poetry, and philosophy commonly read on horseback, having either employment at other times," he wrote. And he threw the horse's reins on to its neck while engaged with his books.

Hiding with a sleek rein saved him from accident, and he observed: "I scarcely ever remember any horse except two (that would fall head over heels any time) to fall, or make a considerable stumble, while I rode with a slack rein." It will "prevent stumbling; if anything will let it seem horse nothing can."—St. Thomas Journal.

Feller Were Good Shakers

During an ice skating tournament in Lingay, Pen, in London, recently city policemen were skating in order to better control the long line of spectators. The "Bobbies" were expert skaters and sailed up and down the track with the graceful gestures of the Russian ladies. Several British amateur championships were decided at the event.

New Typist (after he has finished letter)—I'm sorry, but I've torn the "what did you say between 'Dear Sir' and 'Yours Faithfully'."

Water Supply System Of Los Angeles

Not Affected By Earthquake It is an interesting fact that in disturbances of the earth's crust that occur along the fault which lies on the western coast of the American Los Angeles water supply system appears to escape serious injury. That this mighty engineering work should occupy a nonvulnerable position in an unstable land is beyond belief, and the gifted designers were capable of such, but not of discerning when catastrophe would have. Yet so far its canals and aqueducts have remained intact while other structures have been destroyed—New York Item.

Money In Turkey Even with the lower prices prevailing in London, the \$1,577,000 from dressed poultry last year. At \$1.30 each the \$50,000 turkeys brought \$335,000.

The labor movement became a factor in politics in England over a hundred years ago.

Tragedy Of Vanished Race

Many Skeletons Found By Explorers In East Greenland

Visions of a new race of hunters springing up in the icy wastes of East Greenland, where explorers now find the skeletons of bygone dwellers, were conjured up by Captain Mikkelson, who described his voyage of exploration before the Royal Geographical Society in London.

"Almost everywhere along the coast," he said, "we found numerous traces of the dead once gave the means of existence for a numerous tribe of Eskimos. But hard times fell on the tribe; it dwindled and disappeared."

"Only once has the Northeast Greenland Eskimo been definitely seen by a European—in 1828, when Clavering found twelve people, who disappeared, frightened by the presence of the white man, and whose descendants have never been seen since."

"When one has considered the tragedy of the tribe which has disappeared, the thought comes—why not try to recreate the human activity which once existed along these barren stretches of coast by creating again the basis of existence for the disappearing Greenlanders, whose only means of livelihood is hunting?"

"Once upon a time a large number of Eskimos must have been living in this district. Both in the huts and (especially) in the graves we counted many archaeological finds of importance."

"A catastrophe must have overtaken the Eskimos, for in several huts we found a number of skeletons, and it seemed as if the Eskimos had been with a sudden death."

"We found a rather large Eskimo settlement, very old and entirely in ruins with a number of graves, most of which were empty. The ruins had been of implements among the ruins many of which were well preserved in their archaeological value."

"To judge from the implements, this coast seems to have been inhabited about 1400-1500."

Want Representation

Grain Growers' Association Foes Resolutions At Regina

The Grain Growers' Association of Saskatchewan, organization committee, at a meeting held at Regina, passed resolutions asking that when appointments are made to the debt adjustment committee, the government should at least one representative for agriculture.

Another resolution calls on the provincial government, to name two senators to George Smith, trade and freight commissioner for Saskatchewan, to select importations through the port of Churchill, and to increase traffic through that port.

Another request that will result from the meeting is to be made to federal government, and those in Manitoba, Saskatchewan and Alberta, for lowering of insurance rates. These governments will be asked to request the London to lower their tariffs for insurance of cargoes to and from the port of Churchill.

Another request that will be for investigation to ascertain if the shipping season cannot be extended.

Escapes Damage

Water Supply System Of Los Angeles Not Affected By Earthquake

It is an interesting fact that in disturbances of the earth's crust that occur along the fault which lies on the western coast of the American Los Angeles water supply system appears to escape serious injury. That this mighty engineering work should occupy a nonvulnerable position in an unstable land is beyond belief, and the gifted designers were capable of such, but not of discerning when catastrophe would have. Yet so far its canals and aqueducts have remained intact while other structures have been destroyed—New York Item.

Gardening Notes

By Gordon Lindsay Smith

In the small garden, vegetables should be limited to those things which have their production and water picking and those which are wanted in small quantities often, and usually at the last minute. In the first class, beans, carrots, peas, celery, stalked tomatoes, cucumbers, beets and rhubarb are suggested. In the second class, cabbages, lettuce, will produce big crops and require very little attention. Under the heading of freshness, there will be peas and corn. Trust that both occupy a lot of room and more than average space will be needed, but neither of them taste the same as when picked within a couple of hours of when served. For handy things, of course, lettuce, either head or leaf, and cobs both of the green variety from Dutch sets and the other various kinds, have places of their own. If grown in the back garden, they will be the first to be picked. To these, two other salad materials like cress and endives might be added. In home vegetable under these are very conditions it is essential that several plantings at ten-day intervals are made that there will be a continuous supply.

Lawns—Seeding down is the cheapest method of establishing a lawn, and one has some control over the quality of the seed and the freedom from weeds, it is also the most satisfactory. One should spend a week or two in looking the piece of ground over. Dig deeply, and even as possible, then allow to lie idle for a week or ten days in order to allow the soil to settle. Then the seed may be sown. The seed will be in the soil a chance to germinate. Before seeding, rake level again, and then if a permanent, even-colored turf is wanted, use that will improve with the years, use the best grade of seed obtainable and get it from a reputable seed dealer. The most even results the seed is sown twice, once by hand and again by roller. Cover lightly by raking one way only, and if possible use a roller or powder. Start mowing with a sharp machine when the grass is about two inches high. A good, serviceable lawn can be developed from seed in a couple of months. One pound of seed will sow 700 square feet.

Strawberries—The strawberry, like the rose, is a perennial. It is a plant that can grow the Forsythia or Golden Bell, which is very early and well known. It is a plant that can grow in a few shrubs in every garden. Among the most satisfactory, in order of blooming, according to this authority, are the Spirea Arguta and Van Houttei, Russian Tea Shrub and Chusan Prunella. These are all very hardy. In the milder parts of Canada one can grow the Forsythia or Golden Bell, which is very early and well known. It is a plant that can grow in a few shrubs in every garden. Among the most satisfactory, in order of blooming, according to this authority, are the Spirea Arguta and Van Houttei, Russian Tea Shrub and Chusan Prunella. These are all very hardy. In the milder parts of Canada one can grow the Forsythia or Golden Bell, which is very early and well known. It is a plant that can grow in a few shrubs in every garden. WORLD HAPPENINGS
BRIEFLY TOLD

The famous international horse show in London, has been abandoned for this year.

A record, probably without parallel in the Dominion, is on hand by Guelph, Ontario, where not a single motor fatality occurred within the city limits during 1933.

Employing 45 men, camp No. 3, owned by P. Bain, logging operator of Dewdney, B.C., has re-opened. The mill and camp, closed since November, will cut for export.

Alexander Sangster, who once homesteaded a quarter section of land, in what is now the heart of Winnipeg, is dead at New Westminster, B.C., aged 80.

W. A. Crawford-Ross of Nanaimo, Alberta, was re-elected president of the Alberta Herdford Breeders' Association at the annual meeting in association at the annual meeting at Calgary.

Major W. H. Gladstone Murray, M.C., prominent official of the British Broadcasting Company, has arrived in Ottawa to begin his temporary duties as adviser to the Canadian Radio Broadcasting Commission.

Construction of a \$ 870,000 oil refinery in Calgary is planned by Peter Ernest Oil Companies, Ltd., Harold J. Maloney, chairman of the company's board of trustees states. The plant's capacity would be 250 barrels a day.

Alberta's legislature has adopted a motion presented by Premier J. E. Brownlee, urging the Dominion Government to call on such a possible conference to discuss changes in the British North American Act.

England will probably not be represented at the Canadian Science on Connaught ranges, Ottawa, this August. Lord Cottesloe, president of the National Union of Students, "afraid financial conditions would prevent" the sending of an English team.

Statement is Denied

Stefansson Says Eyes Do Not Change Color During Arctic Night

Brown eyes do not turn blue during the long nights of the polar region, according to Dr. Vilhjalmur Stefansson, noted Arctic explorer. Science Service quotes him as refuting, in a communication to the editor of Science, the statement in another magazine that "after a prolonged absence of sunlight, man on polar expedition find that their eyes, irrespective of previous color, have turned blue."

Dr. Stefansson, in all his long experience in the lands of long night could not recall having observed this phenomenon. The statement was alleged to have been inspired by an entry in the Journal of Arctic Science.

British explorer who perished after having reached the South Pole. Inquiry addressed to Canadian Science companion and collaborators not only failed to bring confirmation of this report but brought forth statements to the opposite effect. Dr. Stefansson said the sun return at the end of a polar night with eyes that are still dark.

Halifax Had Freak Winter

Lowest Temperature Recorded Was Seven Degrees Above Zero

Yachting on the harbor was not the only unusual incident of this freak winter in Halifax. For the first time since weather records were first begun in the city, about 60 years ago, the mercury failed to drop to zero during the months of December, January and February.

Mean temperature during February was 29.3 degrees, or nearly six degrees higher than the mean mark of 23.69 established during the last 29 years, according to figures compiled by Frederick H. Roman Dominion meteorologist here.

The coldest day of the winter was Feb. 11, when the temperature was seven degrees above zero.

Absence of snow was another unusual feature of the winter. For instance, the total of snow and rain combined in February was 6.31 inches. During the same month last year the total was 17 inches.

U.S. Leads in Apple Production

Apple orchards of the world are estimated at 7,146,000 acres, with a yearly production of 550,000,000 bushels. Canada supplies only 2.4 per cent of the total, the United States being in the lead with 35 per cent.

Sassafras trees have three distinct leaf forms and all three may often be found on the same tree.

W. N. U. 1938

Expensive Economy

Skimping On Advertising Has Always Always Been Poor Business

Henry C. Lytton, a veteran Chicago merchant, is quoted as observing that 1933 is of all years a year in which business men should make full use of advertising. And he speaks of what he knows.

Forty six years ago Mr. Lytton launched his business. He had, he points out, just \$12,000 capital, but he did not hesitate to spend between \$2,500 and \$4,000 of it on newspaper advertising before he even opened his doors.

His business recently was valued at approximately \$7,000,000. As a testimonial to the work that a wise advertising program can do for a business his experience speaks volume. Skimping on the advertising appropriation can be false economy of the most expensive kind.

Japan Buys Canadian Nickel

To Be Used In Making New Small Cabbage

The finance ministry recently bought from the International Nickel Company of Canada several hundred tons of nickel for the purpose of minting new small change to replace the present five and ten-cent pieces of nickel and copper alloy. The sum is \$100 of the yen, which is equivalent to about 22 cents.

Officials of the finance and war ministries denied any knowledge of a plan to convert the present coins into bullets.

CHAPTER VIII.—Continued.

The innocent patrol blew up. There was nothing Haskell could do about capturing those hands. He knew that if Williamson asked why no more had been made, the short-handled man at the post would at least make an excuse. Besides, one of the other detachments, out on Hudson's Bay or southeast in the Reindeer Lake country, would probably nail those hands and the affair would blow over.

Those rainy, impressive days, as he sat in his cabin and looked out along the shore for a mere glimpse of Elizabeth Spaulding, he was tortured by the question: why she was still here, and what stood between her and Baker. Why had Baker bought out in such hot haste and left this North country that was his home? Was Elizabeth waiting for him, or had they split up?

Sometimes it seemed to Haskell that his appointment to this northern post had not been a mere vagary of luck but a manifest act of destiny, that he might meet Elizabeth Spaulding. His triumph over Baker, his commission as a Mounted officer, his career in the Mounted—what did it all mean to him? He thought of the whole of it with a great deal of regret, for losing Elizabeth after he had found her? With the sincerity of the only passionate love in his life, he felt that if Baker married her and took her away, his victory over the ex-sergeant would be a grinning mockery.

Late one quiet evening, when Bill Hardwick was gone on patrol, Haskell saw Elizabeth go up the steps to the cabin which had been Baker's, and light the candles there, and after a quarter-hour came again, tripping down the grassy terrace to Mrs. Drummond's flower garden, and sat down alone by the edge of it.

He went out of his luxurious cabin and out along the twilight slope toward her. . . .

He sat in hand, Haskell came up. With cold, arctic eyes she surveyed him, amused at his humility. Toward her man had no pride left. . . . She remained his thrall. "I've been asked you not to talk with me again."

"Yes, you did," he said humbly. "I haven't forgotten. It's made these last couple of days pretty miserable. But when I saw you over there tonight. . . . Elizabeth, what you're in—can't I just talk a little while? I got some news day before yesterday that cut me up pretty bad. . . . He waited for her to comment, but

she said nothing. "You remember last winter I said my father was in poor health? I got a radiogram night before last about—about him."

Elizabeth understood that his father had died. She was quite well aware that Haskell was not exactly stricken by the news, though he was trying to play upon her sympathy.

She wondered why he was discussing the matter with her now. As he went on talking of it, she began to see his reason. His mention of the big country estate outside of Cobham, the town house in Ottawa, the extensive and valuable timber lands up the Kitchissippi. When he hinted at himself being the only heir and the owner of all this, she saw his whole drift.

The news left her entirely cold. From his treatment of Alan she knew how tricky and dishonorable he could be. He was trying to bait her. She smiled sardonically at him for being so crude about it. Probably he thought to make her his Ottawa mistress.

The affections of such a man were evanescent at best, and certainly quicksand to build upon. Imagining her relatives with this man if she ever allowed herself to become dependent on him, she saw him staring off marriage by the old threadbare dodge, and at last turning coldly away, when passion went. Alan Baker in this would go farther than Baker and his Cobham estate. Alan was honest, he could be depended upon.

Angry and contemptuous she arose. "I get to go. But there's something I really must thank you for, Inspector."

"You thank me for?" His too hot eyes were looking toward her eagerly. "I'm glad. . . . I didn't know I'd done—"

"You didn't intend it as a favor. But it was." With mocking irony in her tones she went on: "Last winter Alan was offered a very splendid position in Victoria. I wanted him to take it. You used to say he was a non-com with no prospects, and that you remembered as I felt. He didn't want to leave. He wanted to stay in service and live here in the North. Just when he was wavering, you forced his hand. You made him buy out, and so you made our marriage possible. I'm awfully grateful to you, really. You didn't realize what a favor you were doing."

She left him standing there, staring after her, dazed and speechless. . . .

That same evening, only an hour later, Haskell made a discovery so startling that in some measure it cut his tortured thoughts away from Elizabeth.

A knock sounded on the door, and Whipple came in with a report. "The last week I mined fifty gallons of gas and five of oil from our mine. I thought it might be a paper mistake, but today I checked up again and we're about still more."

"Well, what about it?" Haskell snapped.

"Nothing, sir; nothing at all," Whipple said hastily. He saw that his chief was in a vicious mood, and he backed away to the door. "I just thought that you would like to know, sir. Most likely some half-breed with an outdoor motor is stealing this, sir."

And he closed the door quietly, and went again, unable to hear his stinging thoughts; Haskell turned in desperation to the service radio set in an effort to distract himself. As he had done on evenings past, he picked up an Edmonton station. Among the orders, news and personal messages, he heard that an aviator named Featherfoot and another man, name unknown, had stolen a flying machine, a propeller, pack-chairs, flying instruments and other things at Edmonton; and escaping in Featherfoot's monoplane, had last been sighted following the Alberta and Great West railways railroad toward McMurray. The posts were warned to be on the lookout for the plane and to arrest the aviator on sight.

The name and description of Featherfoot meant nothing to Haskell, but the description of the other person made him thoughtful. Tall, rangy, gray-haired, gray-eyed, with a long prominent nose across his left temple—that description would fit Alan Baker to a dot. And Baker had gone south and might conceivably have reached Edmonton.

Haskell pondered this possibility a minute and then dismissed it. It was Bill Hardwick who innocently opened his eyes to the truth.

Knocking, entering, standing before the desk, Bill requested: "Sir, if you don't mind, I've got three days free time coming to me, and if you don't mind I'd like to take them now. I'd like to have them in a row, if you don't mind—"

"I'm short of men as it is," Haskell cut him off. "You can't go. That's that."

It wasn't "that" for Bill. Refusing

FAT GIRLS OUT OF FASHION

Women of All Nations Slimming

All over the world Kruschen Salts is appearing to girls and women who are striving for an attractive figure.

Here is a method they are following to banish fat and bring into bloom all the natural attractiveness that they possess; every morning they take a half-teaspoon of Kruschen Salts in a glass of warm water before breakfast.

They do this every morning—without missing one—because it's the duty dose that takes off the fat. When Kruschen is taken daily, every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys, and bowels are toned up and the pure, firm flesh containing Nature's six life-giving salts is carried to every organ, gland, nerve, and fibre of the body, and this is followed by that Kruschen feeling of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity, and a charming figure.

This was the case if she ever allowed herself to become dependent on him, she saw him staring off marriage by the old threadbare dodge, and at last turning coldly away, when passion went. Alan Baker in this would go farther than Baker and his Cobham estate. Alan was honest, he could be depended upon.

Angry and contemptuous she arose. "I get to go. But there's something I really must thank you for, Inspector."

"You thank me for?" His too hot eyes were looking toward her eagerly. "I'm glad. . . . I didn't know I'd done—"

"You didn't intend it as a favor. But it was." With mocking irony in her tones she went on: "Last winter Alan was offered a very splendid position in Victoria. I wanted him to take it. You used to say he was a non-com with no prospects, and that you remembered as I felt. He didn't want to leave. He wanted to stay in service and live here in the North. Just when he was wavering, you forced his hand. You made him buy out, and so you made our marriage possible. I'm awfully grateful to you, really. You didn't realize what a favor you were doing."

She left him standing there, staring after her, dazed and speechless. . . .

That same evening, only an hour later, Haskell made a discovery so startling that in some measure it cut his tortured thoughts away from Elizabeth.

A knock sounded on the door, and Whipple came in with a report. "The last week I mined fifty gallons of gas and five of oil from our mine. I thought it might be a paper mistake, but today I checked up again and we're about still more."

"Well, what about it?" Haskell snapped.

"Nothing, sir; nothing at all," Whipple said hastily. He saw that his chief was in a vicious mood, and he backed away to the door. "I just thought that you would like to know, sir. Most likely some half-breed with an outdoor motor is stealing this, sir."

And he closed the door quietly, and went again, unable to hear his stinging thoughts; Haskell turned in desperation to the service radio set in an effort to distract himself. As he had done on evenings past, he picked up an Edmonton station. Among the orders, news and personal messages, he heard that an aviator named Featherfoot and another man, name unknown, had stolen a flying machine, a propeller, pack-chairs, flying instruments and other things at Edmonton; and escaping in Featherfoot's monoplane, had last been sighted following the Alberta and Great West railways railroad toward McMurray. The posts were warned to be on the lookout for the plane and to arrest the aviator on sight.

The name and description of Featherfoot meant nothing to Haskell, but the description of the other person made him thoughtful. Tall, rangy, gray-haired, gray-eyed, with a long prominent nose across his left temple—that description would fit Alan Baker to a dot. And Baker had gone south and might conceivably have reached Edmonton.

Haskell pondered this possibility a minute and then dismissed it. It was Bill Hardwick who innocently opened his eyes to the truth.

HELP FOR Tired WIVES

Take Lydia E. Pinkham's Vegetable Compound

It was Bill Hardwick who innocently opened his eyes to the truth.

ation darkened and flickered out. How would it look for the innocent to capture or kill those men, or at least corner them and go down fighting? What would the higher officials have to say about that?

All his hatred and jealousy of Baker flared up. Not only was this man going to marry the girl he loved; this relentless sergeant, rising out of a crushing defeat, was going to show him up and make his very name a joke throughout the Empire.

"You are instructed—" he still heard those crackling words flashing up across the wilderness from Edmonton—"to capture that plane and to arrest those criminals on sight."

Baker was a criminal, a wanted man, subject to arrest, certain of a peacetime sentence somewhere to the south he was flying up across the latitude. He had a rendezvous somewhere with Hardwick.

Hardwick could be trailed to that meeting place! The plane could be captured, Baker arrested, sent up for a term. . . .

(To Be Continued.)

Canadians Win King's Trophy

Boys Showed Highest Efficiency In

Miniature Rifle Shooting

Canada has again won the King's trophy for miniature rifle shooting among the boys of the British Empire.

More than 4,000 boys competed for the trophy, which is awarded to the country showing the highest average in imperial rifle shooting.

Canada secured an average of 88 points. South Africa 84, Great Britain 73, New Zealand 68, and Australia and India failed to qualify.

Canada won 135 medals for individual scores and South Africa was tied with 35. The Senior Imperial Challenge shield for small senior units was won by Don Kent, Canada, with Athens, Ontario, high school, Canada, second.

The Earl Jellicoe sword for large senior units was won by Hamilton Collegiate, Canada, with the Cameron Highlanders cadets of Winnipeg, second.

The Junior Imperial shield for small units was won by the Woodbridge, Ont. cadets, while the Earl Jellicoe sword for large units was won by Calgary Hillhurst school, with the Quebec Commercial Academy second.

Canada secured 11,288 boys. South Africa 12,492, New Zealand 10,520, Great Britain 5,977. Thirty-eight Canadian units were in the honor list.

THE RHYMING OPTIMIST

By Alice Michelson

NONE CAN DOUBT

The world is so abrim with ecstasy

On any sun-set, wind-whipped April

Life's days so strongly rising in each

So surely pulsing through each rob-

ber's lay.

That none can doubt the wisdom of

The plan.

Which paints such beauty on a way-

ward, flower.

And through unnumbered springs

Since time began

Have given to countless birds song's

lovely dower.

Oh, every type-pattern that is traced

With such infinite precision glads,

So fully listed, so excellently

None can deny the whole vast scheme

must be

As perfect as the little part men see!

Musicians Play On Streets

Artists Forced To Make Living In

They say that street music in London, England, has suddenly gone

highly, the reason being that over

city per cent of the musicians of the

country are out of employment. It is

no uncommon thing, we are assured,

to hear the violin and other instru-

ments played busily on some of the

quieter streets, the artists seek-

ing to make their living in that way.

The intention of the talking, the

consequent, doing away with orchestra,

has accentuated the problem grow-

ing out of the ordinary unemploy-

ment situation—New Outlook, Toronto.

Tryng Lark All Grain Show

Mrs. Mary E. Maycock, of Milford,

Prince Edward County, Ontario, the

only woman who has ever won three

championships in succession, at the

Chicago International Grain Show,

has entered samples of beans for the

World's Grain Show at Regina.

Isn't it funny that though it is the

best that fails it is the day that

breaks?

HEADACHE

Here's Quick Relief:

Aspirin brings you immediate relief. It acts before you can feel any effect at all from the slower forms of relief.

Do not hesitate to take Aspirin tablets because of this speed. Their quick action is due to the fact they dissolve immediately. They are perfectly safe. They do not depress the heart.

That's the beauty of a remedy like Aspirin. Anyone can take it, as often as there is any need of its comfort. In

sufficient quantity to get complete relief. You could take Aspirin every day in the year without ill effects.

When you wait relief from headaches, colds, neuralgia, or neuritis, period pains, etc., stick to Aspirin. You know what it will do, and you know what you are taking.

The new reduced price on bottles of 100 tablets makes no reason for experimenting with any substitute for relieving pain. Insist on Aspirin.

SPRIN has SPEED!

Another Cure Announced

Scientists Work Out Serum Treat-

ment For Undulant Fever

Three research workers of the College of Medicine at the University of Cincinnati have announced the development of a serum that transforms the usually disabling undulant fever into a mild, non-infectious state.

Undulant fever—Malta fever, as it is known in Europe—ranks second only to tuberculosis in economic importance in its effect on livestock as well as on man.

The serum was developed by Dr. Alfred E. O'Reilly, Dr. W. M. Wherry and Dr. Lee Foskey. Like many others who have worked with the disease, Dr. O'Reilly fell ill of it, but recovered to resume his work.

Undulant fever gets its name because the temperature of the sufferer rises and falls in definite and regular curves. Fever, pain and disability continue, often for years. The new serum, the three researchers say, cures in from three to four days.

In their research, the three Cincinnati scientists found customary methods wouldn't work; that vaccine made from the germs themselves were far too dangerous to inject into anyone, so they lugged in trace oxide gas through the liquid which nullified the poison, yet left the vaccine as effective as before.

The serum they say by injecting the vaccine into dogs, drawing off blood and using the blood left, it left blood and using the liquid that remains when the blood coagulates.

Full Measure Given Twice

From the results of recent inspections of blower tests by the Seed Branch of the Dominion Department of Agriculture it is evident that manufacturers are not seeking to take advantage of the tolerance of 5 per cent allowed by the Inspection and Sale Act in the length per pound guaranteed. Of 381 samples tested last year, 238 exceeded the length per pound guaranteed, and only 5 were short of the 5 per cent limit of tolerance.

German War On Musketeers

Herbert Adam Roth, chief trapper for the Haverian Government, has just completed a war against musketeers in the forests of Germany, during which thousands of the pests were slain by an invention which he perfected recently. Musketeers did great damage to his fur, but now Barrota has few, if any.

Drilling for oil is to be attempted in the Hart Mountains of Germany.

The Prince of Wales is an expert on skates.
